

CATWORTH PARISH COUNCIL

CHAIRMAN: Charlotte Wilson

We're pleased to announce the arrival of our new Mobile Vehicle Activated (MVAS) sign, acquired with funding from Cambs County Council. It will be moved around the village at regular intervals and the data collected will help to inform us when we consider further road safety measures.

A big Thank You to our SpeedWatch volunteers who installed the unit for the first time this morning (Thursday 1st August 2024). They will be managing the unit for us, and were the driving force in kickstarting our fund application. We are most grateful to you all for helping to make our roads safer. FYI, the MVAS unit records speeds and numbers of vehicles passing, not registration numbers, so the SpeedWatch sessions will continue throughout the year. These are still needed as their data is fed back to the police for enforcement when needed.

Don't worry if sometimes the screen doesn't display, background functions will still be operational and it will be getting frequently checks from our volunteers. However as the MVAS unit does now belong to the parish, if you think the unit has been physically damaged in any way please do report this immediately either to the parish clerk, any of the parish councillors or anyone on the SpeedWatch Team, many thanks.
